The Integrated Care for Kids Model (InCK) Model and InCK Marks: Using EPSDT

Presenters: Kay Johnson, Johnson Group Consulting & InCK Marks National Advisory Team Co-Chair

Elisabeth Wright Burak
Senior Fellow, Georgetown University Center for Children and Families

Moderator: Charles Bruner, InCK Marks Resource Network Manager

March 19, 2019

---

Agenda: Using EPSDT

1. InCK Marks Overview and Framework
2. Basics of the Integrated Care for Kids (InCK) Model
3. Basics on Medicaid’s EPSDT benefit for children 0-21
4. Role of EPSDT in InCK Model and state InCK design
5. Next steps and opportunities for child health champions
Purpose and Disclaimer

- **InCK Marks** developed under funding from the Robert Wood Johnson Foundation and the Perigee Fund to:

  > provide resources and supports to child health advocates and experts, practitioner champions, family and community leaders, state administrators, and policy makers regarding reviewing and developing applications for the InCK model.

- **InCK Marks** has no affiliation with CMS, produces only nonproprietary information, and does not claim to be an authoritative source for developing a competitive application.

InCK Marks: Modus Operandi

- **InCK Marks** offers “state of the field” information on Medicaid and child health that brings the best thinking and research to inform application review and to advance innovation in child health
  - Through website, webinars, shared resources from partners, and new syntheses of resources relevant to different aspects of the InCK Model.

- **InCK Marks** has established a guiding framework that emphasizes:
  1. prevention, early intervention and treatment responses to child health,
  2. a developmental approach that recognizes the need for different responses and pediatric roles by child age, and
  3. building upon high-value, evidenced-based practices and their value in providing care in developing payment systems.
Frame: Child Health Outcomes by Developmental Stages

**Infant/Toddler**
- **Perinatal** – Optimal birth outcomes for mother and child
- **Birth to 3** – Optimal physical health, secure attachment and early development of self-regulation, language, and identity

**Child**
- **3 to 6** – School readiness (physical health, language & literacy, approaches to learning, social & emotional development, cognition)
- **6 to 11** – Staying healthy and strengthening social, emotional, and cognitive skills, including learning to read and on-grade school performance

**Adolescent**
- **12 to 17** – Staying healthy and successful in school, responsible behaviors (alcohol, tobacco, and drug use; sexual activity; law-abiding behavior)
- **17-21** – Staying healthy and transitioning to adulthood to succeed in the world of work and community, school/lifelong learning, responsible parenting

Partner Resource Network
Federal InCK Model Basics

• The Center for Medicare and Medicaid Innovation (CMMI) was established and received $10 billion in funding (over ten years) under the Affordable Care Act to promote innovation in health care payment and service delivery.
• CMMI’s grants primarily have supported innovations related to (adult) high cost and chronic care populations in Medicare and Medicaid, including state SIMs grants.
• New Integrated Care for Kids (InCK) model is the first CMMI funding effort specifically focused upon children and on social and behavioral as well as physical health.

Basics – The InCK Initiative Framework

• Provides up to $16 million in funding over 7 years to eight states in competitive grant model ($128 million total)
• Applications described in Notice of Funding Opportunity (NOFO) and due June 10, 2019
• Funds to design and implement an alternative payment model and integrated service delivery model for children prenatal to 21 within a specific, sub-state geographic area
• State Medicaid agency must be involved and partner with a Lead Organization to develop an integrated community model.
• Emphasis includes reducing and preventing unnecessary out-of-home placements and hospitalizations
Basics: Three Entities Must be Engaged

Medicaid Agency
- Partner with Lead Organization
- Responsible for Alternative Payment Model and data

Lead Organization
- Established entity
- Local convening of Partnership
- Coordination & accountability

Partnership Council
- Represent core service areas
- Chartered, formal, engaged

Basics: Child Core Services

- Lead Organizations must coordinate the systematic integration of Core Child Services within model service area for the purposes of integrated care coordination and case management.
- Partnership Council must include representatives from these service areas.
- Lead Organizations and community partners will coordinate these services so families receive an integrated experience of care despite separate funding streams.
What the InCK NOFO says related to EPSDT

- Includes all Medicaid children (age 0-21) in selected geographic area, all of whom must receive the EPSDT benefit (no specific references to EPSDT benefit or any changes to it in the Notice of Funding Opportunity).
- Risk stratification of children requires additional, integrated care coordination for those at service integration levels (SILs) 2 and 3.
- Direct services paid for by Medicaid/EPSDT or other programs, with InCK payments for integrated care coordination/case management.
- Broad definition of health (preventive, developmental, ecological) consistent with EPSDT benefit and *Bright Futures* guidelines.
- References to responding to ACEs and providing trauma-informed care and providing “health-related services,” preference to two-generation approaches also consistent with preventive EPSDT benefit.

Understanding EPSDT

Elisabeth Wright Burak
Senior Fellow
Georgetown Center for Children and Families
DISCLAIMERS

- Medicaid benefits, EPDST subject to legal interpretation. I am not an attorney (but steal from friends who are).
- Medicaid is administered differently in each state. I am not an expert on all of your state policies or procedures.

---

EPSDT is the child health benefit package under Medicaid.

- EPSDT gives legal authority to finance for virtually all services Medicaid covers for children.
- States required to finance an array of prevention, diagnostic, and medically necessary treatment services to children.

Based on CMS EPSDT 416 data for FFY 2017. Also see: Johnson & Bruner. *A Sourcebook on Medicaid’s Role in Early Childhood: Advancing high performing medical homes and improving lifelong health.* 2018. Figure 9.

While the AAP Bright Futures schedule calls for 2 visits per year, in about half of states <80% of toddlers ages one and two enrolled in Medicaid/EPSDT receive at least one visit.

The US average is 78%.
While the AAP Bright Futures schedule calls for annual visits, in most states <80% of adolescents in Medicaid/ EPSDT receive at least one visit.

The US average is 45%.

**Early and Periodic Screenings, Diagnostic and Treatment (EPSDT)**

EPSDT is the Medicaid program's federally guaranteed benefit for all Medicaid enrollees under age 21. Under EPSDT, Medicaid must provide a comprehensive array of preventive, diagnostic, and treatment services.

<table>
<thead>
<tr>
<th>Early and Periodic Screenings</th>
<th>Diagnostic Services</th>
<th>Treatment Services</th>
</tr>
</thead>
</table>
| EPSDT screening = comprehensive well child visit
| Regularly scheduled comprehensive well child visits and screening
| Comprehensive unclothed physical exam
| Developmental screening
| Appropriate vision and hearing testing
| Appropriate immunizations (according to recommendations age and history)
| Appropriate laboratory tests (including lead screening)
| Dental screenings and referrals to a dentist (for children beginning at age 1)
| Health education/anticipatory guidance for parents, children, and youth
| Diagnostic services when a risk is identified, including follow-up testing, evaluation, and referrals
| States must provide timely treatment services based on risks and conditions identified
| Health care or treatment services include those that are medically necessary to correct or ameliorate defects and address physical and behavioral health conditions

Source: SSA § 1905(r); 42 CFR § 441.56
### Treatment services

**EPSDT Requirements Create a Strong Legal Standard of Coverage for Children**

**Medical Necessity**

- **Definition unique to children:** Medicaid must cover treatments or procedures necessary to “correct or ameliorate defects and physical and mental illnesses and conditions”

**Scope of Services**

- **Scope of services unique to children:** Medicaid must cover all medically necessary services that *could be covered under Medicaid*, regardless of whether they are covered under the State Plan

---

### Medicaid Covered Services for Children—Statute Says...

**Under EPSDT, states must cover all medically necessary services, including those that are “optional” for adults**

#### Mandatory Services

- Family planning services and supplies
- Federally Qualified Health Clinics and Rural Health Clinics
- Home health services
- Inpatient and outpatient hospital services
- Laboratory and X-Rays
- Medical supplies and durable medical equipment
- Non-emergency medical transportation
- Nurse-midwife services
- Pediatric and family nurse practitioner services
- Physician services
- Pregnancy-related services
- Tobacco cessation counseling and pharmacotherapy for pregnant women

#### Optional Services

- Community supported living arrangements
- Chiropractic services
- Clinic services
- Critical access hospital services
- Dental services
- Dentures
- Emergency hospital services (in a hospital not meeting certain federal requirements)
- Eyeglasses
- State Plan Home and Community Based Services
- Inpatient psychiatric services for individuals under age 21
- Intermediate care facility services for individuals with intellectual disabilities

- Optometry services
- Other diagnostic, screening, preventive and rehabilitative services
- Other licensed practitioners’ services
- Physical therapy services
- Prescribed drugs
- Primary care case management services
- Private duty nursing services
- Program of All-Inclusive Care for the Elderly (PACE) services
- Prosthetic devices
- Respiratory care for ventilator dependent individuals
- Speech, hearing and language disorder services
- Targeted case management
- Tuberculosis-related services

Coverage to promote health and development

- **Examples of key services covered for children, (even if not for adults)**
  - Case management
  - Speech-language-hearing, physical & occupational therapy
  - Eyeglasses and hearing aids
  - Dental care
  - Mental/behavioral health
  - Personal care services
  - Assistive technology and durable medical equipment

- **Focus on optimal health & development**
  - Risk screening with objective tools (e.g., developmental, social-emotional-behavioral, maternal depression, and SDOH)
  - Parent-child "dyad" early childhood mental health treatment
  - Home visiting and other “two-gen” approaches
  - School health and health services related to special education

Three E’s for Understanding Medicaid /EPSDT Coverage

- **Eligible services** covered for
- **Eligible and enrolled individuals** delivered by
- **Eligible and enrolled providers**
EPSDT “Medical Necessity”

- “Determination of whether a service is medically necessary must be made on a case-by-case basis, taking into account a particular child’s needs.” (CMS)

- EPSDT medical necessity definition is broader than private plans
- Medical necessity determinations
  - Must be individualized.
  - Are made by states with health provider input.
- EPSDT purpose includes prevention & early intervention
  - if service will prevention condition
  - if service will improve health or ameliorate condition
  - if service will cure, maintain, or restore health

Medical Necessity for Children

- Broader in Medicaid than in Medicare and private plans (“correct or ameliorate”)
- Decision must be made on a case-by-case basis
  - States may not impose hard limits on pediatric services
  - States may impose tentative limits on services pending an individualized determination, a decision shared by the state and the child’s treating provider
- Medicaid MCOs/ACOs may not use a definition of medical necessity for children that is more restrictive than the state’s.
Helping stakeholders improve EPSDT

Protect and strengthen children’s Medicaid benefits under EPSDT at the federal and state levels by:

- Educating and raising awareness among policymakers and other stakeholders about EPSDT and its critical role for children
- Strengthening the capacity for collaborative initiatives between state child advocates and AAP chapters (including technical assistance with 6 states)
- Identifying and executing state-level strategies to strengthen EPSDT protections for children enrolled in Medicaid

EPSDT and InCK

WWW.INCKMARKS.ORG
EPSDT benefit is central to InCK Model

• Everything Medicaid covers for kids is EPSDT
• Built to be flexible and adapt to what kids need and what we know works
• States have responsibility to make services fit with individual child needs to promote, maintain, and improve health
• We know what works, have evidence-based interventions for prevention and treatment
• InCK provides an opportunity for states to use and test EPSDT flexibility, scale up what works

Under the InCK Model, states can and should

• Design and apply alternative payment model appropriate for children
• Focus beyond short-term savings
• Finance services that change child health trajectories – prevention today to demonstrate savings long term
• Braid dollars from Medicaid, Title V MCH, IDEA, mental health, child welfare, state & local general revenues, and other funds to maximize resources
• Incentivize high performing pediatric medical homes
• Apply family-centered, two-generation approaches
Funds from Child Core Services

- InCK Model assumes resources from each core service area will be used.
- Some are eligible for Medicaid financing under the EPSDT benefit.
- Others/all can be blended and braided to support integrated services, as part of an alternative payment model.

Today, every state Medicaid program can and should...

- Align with Bright Futures & other care standards.
- Improve quality and performance of medical home.
- Increase use of preventive, developmental, and mental health services.
- Expedite and individualize medical necessity determinations process.
- Use measurement and reward performance.
- Better link Medicaid, Title V, MCH, IDEA, mental health, child welfare.
- Use child-focused payment approaches in managed care, accountable care, and value-based purchasing.
